01:00 PM	Winners Announcement

Technical Requirements

TOOLS

You are allowed to use any game engine you desire along with any combination of coding agents, tools, clis and mcps. Your only limit is your creativity and execution.

Blatant Plagiarism will result in disqualification.
This includes direct copying of assets, source code, as well as copying entire mechanics without any uniqueness.

SUBMISSION

1. Google Drive link of trailer video
2. GitHub public repo link with all source code and assets
3. Deployed game URL (optional)

The Trailer

Your evaluation will be done based on a three-minute trailer of your game.

Two minutes of those three must be **actual gameplay** directly screen-recorded.

You are encouraged to use stylistic editing and graphics like in teaser trailers for one minute, which can be structured throughout the trailer.

Your trailer must detail how exactly the themese were incorporated in your game (see next page)

Your initial evaluation will be done solely on your trailer, so it is encouraged to put effort in it.

EVALUATION

You will be given **THREE** themes, announced on the day of the event.

30% of your evaluation will be done based on theme adherence :

Core Integration (15)
Multi-Theme Synergy (10)
Atmospheric Framing (5)

You are not required to use all 3 themes, but at least 1

The rest of your evaluation will be based on :

Core Gameplay & Feel
Visual Polish
Audio Design
Innovation & Uniqueness
Technical Stability
Scope & Completeness
Trailer Quality

The top 5 games chosen from trailers will be shortlisted for judges to play and select winners
